info@djaodjin.com

Founded in 2014, DjaoDjin is a Delaware C Corporation registered in California, where the main offices are.

"Djao" is a salutation word in Northern Thai that translates to welcome. "Djin" refers to a spirit inhabiting trees, lakes and mountains in Africa. DjaoDjin defines itself as a technology Welcome Spirit. Built by humans for humans.

Product

DjaoDjin is a Platform-as-a-Service (PaaS) perfectly suited to iterate assessment & certification Cloud products. With native support for user management, subscription billing, and role-based access control (RBAC), customers can easily demonstrate compliance with GDPR, HIPPA and PCI regulations.

DjaoDjin delivers on its Welcome Spirit ethos with a strong offering of professional services to configure and customize its hosting platform to fit required workflows. When necessary, DjaoDjin can rely on a network of professional contractors trained to use its open source technology.

Market

Companies that deliver industry-specific professional upskilling, assessments and certifications rely on DjaoDjin to manage these highly regulated workflows cost-effectively. Customers include (varied example):

- EUISSCA Supplier Environmental Sustainability Initiative (EUISSCA is an Alliance of 20 Energy Utilities across North America including PG&E)
<https://tspproject.org>
- New York State Professional Certification Accredited Vendor (CEU)
<https://www.a1ceus.com>
- California Low Income Housing Tax Credit Tenant Certification (CTCAC, LIHTC)
<https://www.tifkey.com>

CEO: Sebastien Mirolo

<https://www.linkedin.com/in/smirolo>

Sebastien has 20 years of experience as a start-up executive. He leads an enthusiastic team of talented engineers and industry-accredited subject matter experts, using the lessons learned co-founding 4 successful technology businesses prior to joining DjaoDjin.

Testimonials on DjaoDjin Customer Relationship

"DjaoDjin is a pleasure to work with for many reasons. They rapidly understand and translate client concept and objectives into functional online application/workflow. Their work ethic is impeccable. There is always someone to respond to any questions or help to make modifications."

- Debora Bonner, PG&E Supply Chain Sustainability

Testimonials on TSP from PG&E suppliers

(names have been redacted to comply with anti-trust regulations.)

"This is like the Carbon Disclosure Project was to us when it first came out. It defines the ideal state / future state one should strive for, but across a broader list of environmental topics than CDP."

- Sustainability Manager at Construction Firm

"We struggle with internal best practice sharing and decision facilitation about what best practices to implement. This tool provides a great value proposition in that regard."

- Sustainability Manager at Transformer manufacturer

"We are already a sustainability leader in the industry. This tool reinforces our internal goals by signaling our leadership that this is what our clients are asking us to do and the direction the industry is going in."

- Sustainability Manager at Transformer manufacturer
